

Patients at Oasis in Derry have plenty of reasons to smile

13 January 2011

Oasis Dental Care has given a boost to patients in Derry with the announcement that health service dentistry places have become available at its state of the art Timber Quay practice on Strand Road, Derry.

The practice combines the very best in patient care with the latest facilities for patients, all in the calming environment found when you are in an Oasis.

The practice team is headed up by experienced lead dentist, Arturo Giribet-Canto and his team of three dentists.

The practice also combines health service dentistry with the very best in cosmetic and private treatments.

For those opting to start 2011 with a new look smile then you can take advantage of the current teeth whitening offer for only £199.

Oasis tell us, however, that the best way to keep your smile looking natural is to reduce the risk of having to have treatment by taking good care of your teeth and gums.

Marguerite Burke, practice manager at Oasis Derry, says: "Our treatments are very popular in Derry, especially as so many people seem keen to get that white smile for the year ahead.

"It's great that we've also been able to offer some new health service dentistry places for 2011. I'd advise people who are interested to get in touch with us right away on 02871 368 448 or drop in and see us anytime."

Oasis Derry caters for all dental care needs, providing everything from regular check-ups to specialist and cosmetic treatments.

The practice prides itself on being a welcoming, friendly environment where dentists respond to individual patient needs. Practice teams of highly qualified professionals make sure patient care always comes first.

Its dentists also do believe that prevention is as important as treatment. Marguerite added: "Oasis believes in preventing the need for expensive or sometimes potentially painful treatment. To make this a reality, we offer all patients advice on maintaining excellent oral health so if anyone in Derry is unsure how to look after their mouth, they only need pop in for a chat."
